HypoMon® receives an Australian International Design Award™

On the 25th July, 2011, AIMEDICS flagship product the HypoMon® received an Australian International Design Award™ in recognition of design and innovation excellence.

AIMEDICS Chairman, Mr Martin Greenberg said “this award is acknowledgement of our significant, ongoing and relevant investment into the HypoMon technology”.

CEO of AIMEDICS, Mr Victor Skladnev said “the HypoMon went through a vigorous assessment by a panel of Australian and international experts with strong competition. To have received this award is further confirmation that the HypoMon will solve a significant problem for people with insulin requiring diabetes”.

The HypoMon System is a non-invasive monitor and alarm for sleep time hypoglycaemic episodes. It is for people with Type 1 Diabetes Mellitus between 10 and 25 years of age.
